

## **Consent Form - CoreFood Test**

### Purpose of the Study

You have been invited to participate in a research study exploring the effectiveness, user experience and usability of the health and fitness tracking application, CoreFood. The study aims to gain your feedback on the overall design, including key features like the AI Chatbot and logging system.

### What Participation Involves

If you agree, you will be asked to interact with a low-fidelity paper prototype that represents the screens on the application. You will be given a specific scenario; the task will be to navigate the paper screens in order to complete the given scenario, acting as if it is a real app. You will need to describe your actions as you complete the task. The session is expected to last 20-30 minutes, with a questionnaire at the end.

### Risks and Benefits

- Risk: You may find it frustrating if the application is difficult to understand or use. Feel free to stop at any time.
- Benefit: Your participation will give valuable insight and help to improve the interface design of CoreFood.

### Confidentiality

All information given during the study will be fully anonymous and confidential with no way of linking back to you. The session may be audio recorded, but those records will only be listened to by the designers.

### Voluntary Participation

Your participation in this study is voluntary. You are free to refuse participation and withdraw at any time. If you wish to withdraw, any data that has been collected will not be used in any way.

### Contact Information

If you have any questions about the study, please feel free to contact any member of the team at:
